

Oliana

OLIANA

ARBEQUINA x ARBOSANA (Obt.1998)

“Variety very interesting due to its very low vigor and growing habit, very adapted to total mechanization. The highlights are: early entry into production and high productivity. The oil is fruity, medium, light in bitterness and spicy, well adapted to the high consumption market.”

CHARACTERIZATION

- Early entry into production.

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- 2º leaf > 1 kg olives/tree
- 3º leaf > 5 kg olive/tree
- Compact growing habit.

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- Less cost in pruning
- Low vigor.

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- 20-40 % less than Arbequina
- Reduction in the planting distances: 3,5 x 1m.
- Fruit's size similar to Arbequina.

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- Weight 1.3 - 1.9 gr.
- Ripening time medium:

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- Between Arbequina and Arbosana
- Good oil yield:

<http://www.olint.com/sites/all/themes/vanderevil/images/list-icon.png>); list-style-type: none; ">

- 14 to 21% oil - 40 to 47% oil in dry matter IM: 1.5 - 2.8
- Very high productivity, without alternance
- Medium tolerance to Peacock spot (*Spilocaea oleagina*).

CATA

- Af 4 - Am 2.5 - Pi 3
- Sweet oil
- Dry fruit and almond
