

AND THE FUTURE...

Tue, 01/01/2013

This technology is advancing very rapidly throughout the world. Other countries have begun incorporating this technology: Argentina, Saudi Arabia, Turkey, Iran, Libya, Algeria, ... The associated advantages (quick entry into production and total mechanization of the harvest and pruning, final quality of the product) along with the years of already-accumulated experience, leads one to think that super-Intensive plantations or hedge-plantations will grow at a very significant rate all over the world.
